

# HI-SPEED USB 2.0 5.25" DRIVE ENCLOSURE USER MANUAL

MODEL 702966

Thank you for purchasing this MANHATTAN® Hi-Speed USB 2.0 5.25" Drive Enclosure, Model 702966. This device will let you quickly and easily transfer, share and archive data, and expand storage capacities for desktop and notebook PCs.

## SETTING UP THE DRIVE ENCLOSURE

**NOTE:** Before making connections to the drive enclosure, set the IDE drive to Master mode. Also, create a copy of your original data to prevent the possibility of data loss should a mistake be made during the setup procedure. MANHATTAN accepts no responsibility for lost data.

1. Remove the tray from the enclosure.

2. Remove the front cover and insert your drive.

3. Connect the 40-pin IDE, audio & power cables to your drive and attach to the panel with 4 screws.

4. Insert your drive back into the enclosure.

5. Attach the back cover.

**USB 2.0 Windows 98SE Installation:** Place the installation CD in the CD-ROM and connect the drive enclosure to your computer. Auto Detect will run the Add New Hardware wizard, which searches for new drivers for the USB 2.0 enclosure. Click "Next."

Select "Search for the best driver for your device (recommended)"; click "Next."

Select "Specify location"; browse to "CD-ROM E:\USB 2.0-98 Driver"; click "Next."

With the prompt "Windows driver file search for the device Hi-Speed USB-to-IDE Bridge Controller," click "Next" to get the prompt "Windows has finished installing the software that your new hardware device requires." Click "Finish."

Installation is complete; just restart your computer. **NOTE:** For Windows Me/2000/XP/Vista/7, no need to install the additional driver: It's already installed. Windows XP needs to be updated with SP2.
