

Wireless G 4-Port Router

Create a wireless network easily in your home or office.

Model
524636

The INTELLINET NETWORK SOLUTIONS™ Wireless G 4-Port Router lets you experience fast speeds as you surf the Web, download music or photos, and play online games. This wireless router works with 802.11g as well as the older 802.11b products, and also includes a four-port 10/100 LAN switch so you can connect using network cable or go wireless to satisfy all your needs.

Flexibility

The Wireless G 4-Port Router allows you to conveniently share your network connection with multiple users on your network with or without wires. It delivers 10/100 Mbps (auto-sensing) WAN and LAN connections and is interoperable with 54 Mbps (802.11g) and 11 Mbps (802.11b) devices over a 2.4 GHz band wireless network. The WAN connection wizard makes installation a snap.

Security

Keeping intruders out of your network can be a challenge, and this feature-rich wireless router is designed to make that challenge easier. It includes a true firewall that secures your network against hackers. With Network Address Translation (NAT) to shield your networked devices from intruders, Denial of Service (DoS) attack prevention to avert potential threats by scanning incoming traffic, and WEP, WPA and WPA2 encryption to conceal your information on the wireless LAN from eavesdroppers, you can rest assured that you have taken the necessary precautions to protect the data on your network.

Lifetime Warranty

Strict manufacturing standards ensure the highest quality in all INTELLINET NETWORK SOLUTIONS products. All items carry a full Lifetime Warranty — the strongest quality commitment anyone can make.
