

A/V Component Wall Shelf

Wall Shelving Unit with Tempered Glass Platform and Aluminum Mount with Cable Management for Audio/Video Components

Part No.: **460750**

Put it up against the wall.

When floor space is limited or adding furniture is impractical, the Manhattan A/V Component Wall Shelf attaches underneath or near wall-mounted flat-panel TVs to neatly organize and arrange multimedia components. Constructed of lightweight, durable aluminum materials and shatter-resistant tempered glass, the Manhattan A/V Component Wall Shelf saves space and safely holds DVD and Blu-ray players, receivers, set-top cable or satellite boxes, game consoles and more in a contemporary style. Internal cable management with open architecture helps conceal unsightly cords and connections for a professional, finished appearance without restricting airflow to sensitive equipment. Ideal for residential, office, classroom, conference room and other installations, the Manhattan A/V Component Wall Shelf brings convenient access and modern design front and center.

Features:

- Securely holds DVD/Blu-ray player, receiver, set-top box, game console and more
- Modern tempered-glass design directly mounts on a wall under flat-panel TVs
- Durable aluminum construction with cable management
- Supports most components up to 8 kg (17.6 lbs.)
- Easy installation ideal for home, office and commercial applications
- Lifetime Warranty
